Supplementary material S1: search query log

Who Leads, Who Follows? A Review of Leadership and Guidance Dynamics in Evacuation

Primary search arm

The primary arm queried the sources named in Figure 1 of the manuscript, namely ScienceDirect, IEEE Xplore, ProQuest, Google Scholar, PubMed, Scopus and Web of Science, together with the publisher platforms Springer, MDPI, Wiley Online Library, ACM, PLOS ONE, Frontiers, Taylor and Francis, SAGE and Hindawi. It combined an evacuation term family with a leadership and guidance term family, as described in Section 3.2. The primary searches covered studies published from 2001 onward and were completed in August 2024.

Its yield at each stage is reported in the left-hand column of Figure 1: 851 records from databases and 263 from publisher platforms, 1114 identified, 482 duplicates removed, 632 screened, 243 excluded at title and abstract, 389 sought for retrieval, 20 excluded as reviews and 5 not retrievable, 364 assessed at full text, 128 excluded after full-text review, and 236 included.

Supplementary targeted arm

The supplementary arm broadened disciplinary coverage toward the social-science literature on collective behavior. Five keyword families were issued against OpenAlex, restricted to the years 2001 to 2025 and searched on 11 August 2026. Each is reproduced below exactly as issued.

The arm identified 1794 records, being the sum of the hit counts in the table. Of these, 148 were duplicates and 31 were already in the corpus, leaving 1615 screened, 1477 excluded at title and abstract, 138 assessed in full, 109 excluded after assessment, and 29 included.

Family	Theme, query as issued, and yield
SS-1	Social identity and collective behavior `(evacuation OR "emergency egress" OR "mass emergency") AND ("social identity" OR "self-categorization" OR "collective behaviour" OR "collective behavior" OR "crowd psychology")` *203 hits, 203 retrieved.*
SS-2	Affiliative and prosocial responses `(evacuation OR emergency) AND (panic OR "mass panic" OR "affiliation model" OR "prosocial behaviour" OR "prosocial behavior" OR "helping behaviour" OR "helping behavior") AND (crowd OR disaster)` *980 hits, 980 retrieved.*
SS-3	Witness accounts and interview studies `(evacuation OR disaster OR "emergency egress") AND ("survivor accounts" OR "witness accounts" OR "interview study" OR "qualitative study") AND (behaviour OR behavior OR decision)` *463 hits, 463 retrieved.*
SS-4	Group dynamics under threat `(emergency OR evacuation) AND ("group dynamics" OR "group decision" OR "social influence" OR conformity OR "leadership emergence") AND (crowd OR pedestrian OR occupant)` *110 hits, 110 retrieved.*
SS-5	Emergent norms and roles `("emergent norm" OR "emergent norms" OR "emergent leader" OR "emergent leadership" OR "role improvisation") AND (disaster OR evacuation OR emergency)` *38 hits, 38 retrieved.*

Both spellings were included wherever British and American usage differ, so that the search was not biased toward either literature.
